

LIST OF TESTING & INSPECTION EQUIPMENTS

Sr.	Name of Device	Purpose
1	Electronic Balance	For measurement of Weight
2	Drop Tester	For drop impact test
3	Micrometer Screw Gauge	For measurement of Thickness
4	Vernier Caliper	For measurement of Dimensions
5	Measuring Cylinder	For measuring volume
6	Pressurised Leak Testing machine	To detect pin holes
7	Height Gauge	For measurement of Height
8	Thermometer	For measurement of Temperature
9	Standard weights (01 gms to 100gms)	For Calibration of Scales
10	Standard weights (50 gms to 100gms)	For Stacking Test
11	Melt Flow Index Tester	For measuring Melt Flow Index
12	Top Load Tester	For Top Load Test
13	AIR Compressor	For testing air pressure / leak detector
14	Colour Chamber	To match The shade
15	Compressive Deformation M/c	For testing strength of container
16	Wall Thickness measuring Instrument	For testing nondestructive wall thickness
17	Heat Seal Instrument	For testing Induction sealing of wads.
18	Vibration Tester for Closure Leakage Test	To Check transport worthiness of product
19	Torque Meter	For testing cap fitment
20	Shore A Hardness Tester	For Testing Shore A Hardness of Rubber/ TPE
21	Vacuum Tester	For testing Leakage in vacuum
